So Soft a 100% natural viscose fibre incorporating milk protein for luxuriously soft and supple fabrics ...

Natural

Milk has been an essential part of our lives for thousands of years. So Soft fibre provides a natural product that is both kind to the environment and the skin by fusing together the natural raw materials of milk protein and plant cellulose.

Superior handle

The fabric speaks for itself: knitted or woven, the handle of So Soft/Cotton blends is best described as luxuriously soft and beautiful to touch.

Kind to the skin

Tests prove no allergic reactions and no migration of any heavy metals by skin absorption or from ingestion (EN 71.3)

Versatile

So Soft is ideal for any close-to-the-skin fabrics such as undergarments, baby clothes, bedding, sheeting, fashion: all benefit from the remarkable properties of So Soft.

Blending fibre

So Soft is an ideal partner for luxury fibres such as silk and cashmere - the handle is complementary to both.

Fabrics from blends of cotton with So Soft are fully recyclable comprising only of natural plant materials with incorporation of real milk protein. Incorporation occurs before the fibre is extruded and therefore the benefits are inherent, and do not wash out or rub out.

The natural amino acids that are contained in milk are carried through to the fabric, helping to keep skin healthy and vigorous.

Naturally bacteriostatic, So Soft fibre with milk, prevents odour formation in the fabric.

So Soft fibres dye and process as standard viscose fibres along normal production routes. All colours are possible, regardless of end use.

As So Soft is a wholly natural fibre, we recommend that gentle washing and drying is required.

So Soft :

- . Superb handle
- . Supple fabrics
- . Wholly natural
- . Safe to use
- . Inherent and permanent
- . Readily blendable
- . Complements luxury handle of natural fibres
